

UN WESTERN A LA CHILENA

卷之三

REVIEW OF THE BIRDS OF SOUTHERN CHINA
Edited by T. T. YEH, JOHN B. DUNLOP, AND R. H. WILSON
Price, £12.50. CAMBRIDGE UNIVERSITY PRESS, 1970.
The book contains 112 pages of text, 100 maps, 100 photographs,
and 100 line drawings. It is divided into four parts: Part I, The
Geography and History of Southern China; Part II, The
Birds of Southern China; Part III, The Birds of Hong Kong;
Part IV, The Birds of Macao. The book is well produced and
contains a wealth of information on the birds of southern China.

Domesticated animals were also present.

In 1970, the U.S. Navy and Pacific Northwest Laboratory conducted a study of the effects of low-level plutonium exposure on the health of Hanford workers. The study found no significant increase in cancer rates among plutonium-exposed workers.

Ensuite il convient de déterminer la nature des perturbations qui peuvent être rencontrées dans les conditions de travail.

As mentioned above, we have found that the *in vitro* growth of *S. enteritidis* is inhibited by 100 µg/ml of the antibiotic.

Quando o tempo é curto, é preciso ser mais eficiente. Por isso, é importante priorizar as tarefas e delegar responsabilidades para outras pessoas. Além disso, é necessário ter uma mentalidade positiva e não se desesperar com os resultados imediatos.

En general, durante el año 1960 se han llevado a cabo 104 reuniones de trabajo entre los países que participan en la Comisión y sus delegados. Los trabajos de la Comisión se han centrado en la elaboración de las bases para la futura legislación en materia de control y regulación de las actividades de las empresas y en la preparación de las normas que regularán la actividad económica en el sector público.

Thus, at odds with the findings of the CEC, while the majority of firms in a given industry are not yet at a high level of R&D, there is no general pattern of increasing R&D over time. In fact, the CEC's finding that R&D has been increasing over time is contradicted by our results. In the case of the metalworking industry, R&D has been declining over time. This is true for all four groups of companies.

The main problem in water desalination is the removal of dissolved salts. Reverse osmosis is a good method for removing salts from sea water. The reverse osmosis unit consists of a membrane which has the ability to remove all kinds of pollutants. In the U.S.A., the cost of reverse osmosis equipment is about \$1000 per cubic meter. It is a very effective method for removing salts.

A black and white photograph of a man with dark hair and glasses, wearing a light-colored shirt and a dark tie. He is seated at a desk, looking down at some papers or books he is holding. The background is slightly blurred, showing what appears to be an office or library setting.

197. *THEO. DE BRUYNE.* Van ons te Antwerpen
deze dag een brief gekregen van de heer
Alphonse De Bruyne, die hier een grote
zaak heeft. Hij schrijft dat hij in zijn
vaderland gevlucht is en dat hij daar
niet meer kan blijven. Hij is daarom
naar Engeland gekomen om daar
een goede arbeid te vinden. Hij is
nu in Londen en heeft er een goede
plaats gevonden. Hij is erg blij met
zijn werk en heeft veel vooruitgang
gehaald. Hij is ook erg blij met zijn
verblijf in Engeland en heeft veel
genoten van zijn tijd daar.

...and the more we learn about the brain, the more we realize how little we know. The brain is a complex organ, and it is still not fully understood. While there has been much research, there is still much to be learned. It is important to continue to study the brain and its functions, as well as its potentialities. This will help us to better understand the human mind and its capabilities.
